→She

4. They have worked in this factory since 2001.

→They started.....

C. Write a speech about how to reduce garbage:(1.0 point)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

III/ READING:

• **Read carefully the passage:**

Many people still believe that natural resources will never be used up. Actually, the world's energy resources are limited. Nobody knows exactly how much fuel is left. However, we also should use them economically and try to find out alternative (sự lựa chọn) sources of power. According to Professor Marvin Burnham of the New England Institute of Technology, we have to conserving (lưu trữ) coal, oil and gas before it is too late; and nuclear power is the only alternative.

However, many people do not approve of using nuclear power because it's very dangerous. What would happen if there was a serious nuclear accident? Radioactivity (kích hoạt phóng xạ) causes cancer and may badly affect the future generations.

The most effective thing is that we should use natural resources as economical as possible.

A. Check true (T) or false (F): (1.0 point)

1. (). Natural resources will never run out.

2. (). We don't know exactly how much fuel is left.

3. (). We shouldn't waste fuel.

III/ READING:

• **Read carefully the passage:**

Air pollution causes ill health to human beings. In a lot of countries, there are laws limiting the amount of smoke which factory can produce although there is not enough information on the effects of smoke on the atmosphere. Doctors have proved that air pollution causes lung disease. The gases from the exhausts of cars have also increase air pollution in most cities. The lead in petrol produces a poisonous gas (khí độc) which is collected in busy streets. Children who live in areas where there is a lot of lead in the atmosphere can not think as quickly as other children, and are clumsy (vụng về) when they use their hands.

A. Check true (T) or false (F): (1.0 point)

1. (). There is enough information on the effect of smoke on the atmosphere.
2. (). The air pollution doesn't cause lung disease.
3. (). There isn't any lead in petrol that produces a poisonous gas.
4. (). Children who live in areas where there is a lot of lead in the atmosphere can think as quickly as other children.

B. Answer the questions: (1.0 point)

1. What does the air pollution cause?

.....
2. Who has proved that air pollution cause lung diseases?
.....

3. Is there pollution in the city? Why or why not?
.....

4. What happen to the children who live in the areas where there is a lot of lead in the atmosphere?
.....
