Read the following passage and choose the best answer A, B, C or D:

Just a few years ago, this place was called Dumptown. The people living here didn't think much about where waste went when they threw it out. Things that could be reused or recycled were thrown in the **trash**, because nobody believed recycling made a difference. And, eventually, that became a very big problem.

The garbage heap grew and began to smell. Sometimes it caught fire, and making it hard for everyone to breathe. Dumptowners knew they had to fix it.

They learned to reduce the amount of waste they threw **them** away. For example, they learned to reuse things—like washing out empty jars in - stead of throwing them away. And, they learned to recycle. They set up bins around town to collect glass, paper, and other things, then made into new products.

On April 30, 2018 the Pu'u 'O'o crater on Hawaii's Kilauea volcano, suddenly collapsed. It was the starting point for the volcano's months long eruption, which went on to produce 320,000 Olympic-sized swimming pools' worth of lava that transformed the landscape and ultimately destroyed 700 homes.

A volcanic eruption occurs when hot materials from the Earth's interior are thrown out of a volcano. Some eruptions are terrible explosions that throw out huge amounts of rock and volcanic ash and can kill many people. Some are quiet outflows of hot lava. Several more complex types of volcanic eruptions have been described by volcanologists. These are often named after famous volcanoes where that type of eruption has been seen. Some volcanoes may show only one type of eruption during a period of activity, while others may show a range of types in a series.

1. When did the Pu'u 'O'o crater on Hawaii's Kilauea volcano collapse?
